1 day 10: Introduction to OpenRefine **1**
1.1 BOTS class 1

1 day 10: Introduction to OpenRefine

- Welcome Dr Bryan Winston from PUL!
- BREAK
- share data plans
- work on final projects
- talk about advancing scraping: BAB

1.1 BOTS class

Some more announcements about the BOTS class

- will learn some advanced programming skills
- using the terminal and github a lot more
- how to create virtual environments with python
- how to use github to automate your apps
- finally, advanced scraping!

scraping XHR - hiringcafe.com

- Open inspector, click Network, type in the search bar.
- Then, get the CURL and run it in your terminal.
- `https://hiringcafe.com/_next/data/udL519CreQWXs51amRFp8/`
- classic.json?searchState=%7B%22searchQuery%22%3A%22librarian%22%7D

scraping dynamic elements with ghost browsers

- seleniumbase
- open terminal

- conda activate scrape
- ipython

```
from seleniumbase import SB

with SB(uc=True, test=True, locale="en") as sb:
    sb.activate_cdp_mode()
    sb.goto("https://gitlab.com/users/sign_in")
    sb.sleep(2)
```
